EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Julia Moody on 12/11/06.

The application has been amended as follows:

In Claim 4, line 6, "amine carbonate" has been deleted and - - the amine of said amine carbonate solution - - has been substituted therefor.

The following is an examiner's statement of reasons for allowance:

The prior art of the previous non-final rejection does not teach the amine carbonates of amended claim 4, and there is no express motivation to use them.

The most analogous art other than the references cited in the prior non-final rejection (Moore '900) teaches a method of removing metals from aqueous waste brines using amine carbonates. The instant invention is drawn to a method of removing metal from an organic phase using amine carbonates. There is no motivation to use the process of Moore in an organic media, verses an aqueous media.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1793

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
